Abstract

A method for storing data into a SRDAM. The method comprises the following steps: receiving a plurality of blocks of data; labeling each of said blocks by M and acquiring a corresponding remainder for each of said block, wherein M is the number of blocks; and storing said blocks in said SRDAM in according to the following rule: any logical adjacent said blocks are located phy one said block has a remainder I is stored in the (I+1) bank in said SRDAM, I being a non-positive integer. Moreover, wherein a p stored in sequence, and said blocks are arranged in the order of corresponding remainder.
